TECHNICAL PROJECTS

- **PROJECT NAME: Real Estate Application** Link
  Technologies: Next.js, Node.js, Express, MongoDB
  Overview:
  Architected and developed a fully responsive real estate platform that enables comprehensive property search, comparison, and evaluation.

- **PROJECT NAME: Soccer E-Commerce Application** Link
  Technologies: Next.js, Django, Stripe Payment Integration, PostgreSQL
  Overview:
  Designed and deployed a niche e-commerce platform for soccer enthusiasts, streamlining the purchase of jerseys and footwear through a secure and intuitive interface.

EXPERIENCE

FULL STACK DEVELOPER November 2017 - Present

Various Clients

- **Developed & Maintained Scalable Solutions:** Engineered robust web applications for diverse clients using modern technologies including React, Node.js, Django, and AWS.
- **Performance Optimization:** Enhanced a leading e-commerce platform's user experience, achieving a 20% increase in user retention.
- **Backend Engineering with ML Integration:** Built Django backend systems incorporating machine learning to optimize data processing and user interaction.
- **DevSecOps Implementation:** Established a DevSecOps pipeline with Jenkins and Terraform, reducing deployment times by 30%.
- **Microservices Architecture:** Designed and implemented microservices to ensure scalable, maintainable software ecosystems.

EDUCATION

Miami Dade College
2017
Business Applications Certificate, Computer programmer

Florida International University
2015
Bachelor of Science, Electrical Engineering

Miami Dade College
2011
Associate of Arts, Electrical Engineering

SKILLS

Technical /Computer Skills: Python (Advanced), JavaScript (Advanced), TypeScript (Intermediate), Django (Advanced), React (Advanced), Next.js (Advanced), Node.js (Advanced), Express (Intermediate), AWS (Lambda, CloudFormation, CDK) (Advanced), Kubernetes (Intermediate), Terraform (Intermediate), MongoDB (Intermediate), PostgreSQL (Intermediate), Machine Learning Integration (Intermediate), Git (Advanced)
